

G2P PNEUMATIC DEADMAN

- Self cleaning design extends cartridge life
- Long lever requires minimal force to depress; reducing operator fatigue
- Internal porting designed to provide fast on/off response
- Large button for easy operation and configuration for left or right-handed use
- Wide port spacing provides easy twinline connection

G2E ELECTRIC DEADMAN

- Sealed internally to prevent contamination of electrical switch
- Internal strain relief on cord improves durability and life
- Large button for easy operation
- Can be arranged for left or right-handed use

DEADMAN II

- Wide port spacing provides easy twinline connection
- Non-bleeder style for safer operation

These controls are a superior design that perfectly balances comfort and safety. Made with only the highest quality materials and craftsmanship, Schmidt offers an unbeatable combination of operator safety, unmatched performance and rugged dependability.

Larger buttons, left or right-handed configurations, longer levers and many other features, have given Schmidt deadman controls the reputation of being the most dependable and safest deadman available in the industry.

All Schmidt pneumatic deadman controls are non-bleeder style.

*** Never use bleeder style deadman on Schmidt equipment in order to avoid safety hazards ***
