

TVII (Thompson Valve II)

The TVII is a normally closed, self sealing, abrasive metering valve with instant, smooth response to either pneumatic or electric deadman controls. This fail-safe valve shuts off abrasive flow to the nozzle and seals the tank at the same instant. The clean-out feature provides a quick and easy way to clear an obstruction from the metering sleeve. The TVII is ideal for multiple outlet units and is easily adaptable to most existing blasting systems.

The TVII is designed to offer the highest level of performance and long life.
